AI LEARNING ROADMAP

Complete Beginner to Advanced AI Journey

Designed for Freelancing, Automation & Income

PHASE 1 — Foundations

Module 1 — AI Introduction

Topics: AI kya hai, AI vs ML vs Automation, Real-world use cases, AI earning overview
Assignment: 5 AI use-cases likho jo paise bana sakte hain

Module 2 — Digital Ecosystem

Topics: Internet workflows, Online tools intro, Freelancing platforms, Account setup basics
Assignment: Fiverr + Gmail + GitHub accounts banao

Module 3 — Problem Solving

Topics: Problem identification, Pain points analysis, AI opportunity mapping, Solution thinking
Assignment: 10 problems list karo jo AI solve kar sakta hai

Module 4 — AI Fundamentals

Topics: AI pipeline, Training vs inference, ML vs DL vs LLM, Limitations
Assignment: AI system ka diagram banao

Module 5 — Data Basics

Topics: Data types, Data collection, Cleaning basics, Data importance
Assignment: Mini dataset create karo

Module 6 — AI Tools

Topics: ChatGPT, Claude, Gemini, comparison, strengths/weaknesses
Assignment: Tools comparison table banao

Module 7 — Productivity Systems

Topics: Notion AI, task automation, knowledge management
Assignment: Apna workflow system design karo

Module 8 — First Income Setup

Topics: Fiverr gig creation, AI services, client basics
Assignment: Apni first gig publish karo

PHASE 2 — Prompt Engineering

Module 9 — Prompt Basics

Topics: Structure, clarity, context, formatting
Assignment: 20 prompts likho

Module 10 — Advanced Prompting

Topics: Role prompting, few-shot, constraints, reasoning
Assignment: Complex prompt system banao

Module 11 — Prompt Frameworks

Topics: CRISP, RTF, templates, reuse
Assignment: Prompt framework create karo

Module 12 — Prompt Optimization

Topics: Debugging, iteration, hallucination control
Assignment: Weak prompt improve karo

Module 13 — Content Systems

Topics: Blog writing, SEO, copywriting, automation
Assignment: Content system banao

Module 14 — Client Handling

Topics: Requirements, delivery, revisions, pricing
Assignment: Fake client project solve karo

Module 15 — Prompt Automation

Topics: Chaining, workflows, APIs, scaling
Assignment: Automated system banao

Module 16 — High Income Prompting

Topics: Business use cases, reports, decisions
Assignment: Premium service create karo

Module 17 — Portfolio Project

Topics: Full system build, optimization
Assignment: Fiverr-ready project banao

PHASE 3 — Tools + Automation

Module 18 — Content Automation

Topics: Bulk content, scheduling, SEO scaling
Assignment: Content pipeline banao

Module 19 — Image + Video AI

Topics: Midjourney, DALL·E, video tools
Assignment: Social media pack banao

Module 20 — Research Automation

Topics: AI search, summarization, insights
Assignment: Research system design karo

Module 21 — No-Code Automation

Topics: Zapier, Make, workflows
Assignment: Automation workflow banao

Module 22 — APIs

Topics: REST APIs, auth, integration
Assignment: Ek API connect karo

Module 23 — No-Code Apps

Topics: Bubble, Glide, UI logic
Assignment: Mini app banao

Module 24 — Multi Tools

Topics: Integration, pipelines
Assignment: Multi-tool system banao

Module 25 — Automation Architecture

Topics: System design, monitoring
Assignment: Architecture design karo

Module 26 — Business Automation

Topics: Lead gen, CRM, chatbots
Assignment: Automation setup karo

Module 27 — Automation Project

Topics: Real-world system

Assignment: Paid-level system banao

PHASE 4 — Coding + AI Engineering

Module 28 — Python Basics

Topics: Variables, loops, functions
Assignment: CLI tool banao

Module 29 — Python for AI

Topics: Libraries, APIs
Assignment: Script likho

Module 30 — Data Engineering

Topics: Pandas, pipelines
Assignment: Data pipeline banao

Module 31 — Machine Learning

Topics: Models, training
Assignment: ML model train karo

Module 32 — Deep Learning

Topics: Neural networks
Assignment: DL model banao

Module 33 — MLOps

Topics: CI/CD, monitoring
Assignment: Pipeline design karo

Module 34 — Deployment

Topics: FastAPI, Docker
Assignment: Deploy karo

Module 35 — Scaling Systems

Topics: Optimization
Assignment: System optimize karo

Module 36 — Full Project

Topics: Build & deploy
Assignment: End-to-end system banao

PHASE 5 — LLM + Agents + SaaS

Module 37 — NLP Basics

Topics: Tokenization, embeddings
Assignment: Text system banao

Module 38 — Transformers

Topics: Attention, layers
Assignment: Explain karo

Module 39 — LLM Engineering

Topics: APIs, tokens
Assignment: Workflow design karo

Module 40 — Embeddings

Topics: Vector DB
Assignment: Semantic search banao

Module 41 — RAG

Topics: Retrieval, context
Assignment: Chatbot banao

Module 42 — Fine Tuning

Topics: Dataset prep
Assignment: Dataset prepare karo

Module 43 — AI Agents

Topics: Planning, tools
Assignment: Agent design karo

Module 44 — Multi Agents

Topics: Collaboration
Assignment: System banao

Module 45 — AI SaaS

Topics: SaaS, payments
Assignment: Product launch karo
